

Airopack Planet Friendly Aerosol is packaging of choice for Unilever

Baar, 1 October 2018 - Airopack Technology Group AG (“Airopack”) has shipped the first of many millions to come of its Planet Friendly Aerosol to Unilever for its new product Day2, a dry-wash spray that gets rid of odors, removes creases, and softens fabric.

Airopack and Unilever, both companies of Dutch origin, combine innovation power and sustainability. Airopack invented the innovative Planet Friendly Aerosol. For Unilever sustainability is integral to how the company does business and sustainable packaging innovations are a key element in its sustainability strategy.

Airopack produces a safe, all-plastic pressurized Planet Friendly Aerosol powered purely by air. There are no gas propellants or chemicals; just an ingenious designed pressure control device, the product and pure clean air. Several large Fast-Moving Consumer Goods companies already are keen users of the Airopack Planet Friendly Aerosol. Now Unilever can be added to that list with the launch of its new product Day2.

Quint Kelders, CEO of Airopack: “We are proud of our collaboration with Unilever which is a major milestone for Airopack as a product and as a company. Unilever continuously works hard on improving packaging and making it as sustainable as possible. We are very pleased to play a role in supporting Unilever’s sustainability goals with the Airopack.”

The Planet Friendly Aerosol is developed by Airopack, which holds the relevant patents and is the sole producer of this unique planet friendly aerosol worldwide. Airopack has a worldwide customer base including multiple AAA leading personal & home care brands.
